Property Description

Say hello to Salvaje Grande, a gated eco-friendly neighborhood within walking distance of Playa Grande's stunning white sands! These stunning new homes are inspired by the surrounding flora and animals and are built on regenerative and ecological ideas to integrate and coexist with the natural surroundings. This lovely neighborhood consists of 15 residences and commercial space at the front. Six houses remain on the market. The houses have 3983 square feet, four bedrooms, and four bathrooms. Each is fully equipped with modern tropical décor, manicured with local flora, and has its own 6 x 3 meter pool. Salvaje Grande aims to strengthen the relationship between humans and nature by using building materials and features that are environmentally friendly. The residences have been designed to enhance circulation through cross ventilation, reduce energy costs through the use of solar panels, and maximize natural light through the use of large windows and breeze blocks in the bathrooms.
