Property Description

Casa Tucán, a modern architectural masterpiece perched above Costa Rica's stunning Pacific coast — a sanctuary where the sky meets the sea and every window frames a living postcard. Completed in 2025, this brand-new villa captures the most extraordinary panoramic views in all of Costa Rica — the endless blue of the Pacific Ocean, the lush Nicoya Peninsula, Tortuga Island, the shimmering San José city lights by night, the iconic Tárcoles Bridge, and the untouched Carara National Park mountain range. It's a view that absolutely takes your breath away. Every inch of Casa Tucán was designed to celebrate the surrounding natural beauty. Walls of glass open toward the horizon, immersing you in ocean, jungle, and sky from nearly every space. This exquisite home features two lavish primary suites — one upstairs and one downstairs — each with expansive ocean views, custom-organized walk-in closets with built-in drawers and hanging spaces, spa-inspired soaking tubs, and massive rainfall showers.
