Property Description

Simbiosis is a boutique gated community composed of only 10 premium lots located in the heart of Playa Avellanas, Guanacaste. Designed for those seeking a balanced combination of nature, privacy, and long term value, this residential offering represents a limited opportunity within one of the most attractive coastal destinations on Costa Rica's Pacific coast and within the broader market of Costa Rica real estate. The project has been carefully planned to integrate with the natural surroundings, surrounded by mature tropical vegetation and native trees that provide privacy, natural ventilation, and a direct connection to the landscape. The community offers a secure and exclusive residential environment thanks to its controlled access, permanent security, and limited number of lots. This type of development is ideal for families, second homes, or buyers seeking tranquility within one of the most valued coastal areas of Guanacaste, particularly within the broader market of Tamarindo real estate.
