Property Description

THE ULTIMATE JUNGLE ESCAPE. Tucked deep into the rainforest of Cuervito de Pavones, this expansive property offers a true immersion into Costa Rica's vibrant biodiversity. Sitting at an elevation of 700 feet, you will enjoy a noticeably cooler climate and fresh mountain air, all while being safely away from the corrosive salt spray of the beach. At just \$6.32 per square meter, this is one of the most affordable parcels in the Pavones area. The land is fertile and large enough for a sustainable, "off-the-grid" lifestyle or a private eco-estate. The property features stunning mountain views, and a multi-story build could potentially reclaim an ocean view over the lush canopy. Nature lovers will be surrounded by Scarlet Macaws, Toucans, and three types of monkeys, while adventure seekers are only 12 minutes from the world-class point breaks of Playa Pilon and 25 minutes from the legendary Pavones Point.
