- Acreage
- Fully Landscaped
- Ocean View
- Water Views

Property Description

If you dream of living in an exotic, relatively untouched tropical rainforest with abundant wildlife less than 3 hours from the capital city and under 10 minutes from some of the most beautiful beaches in the world, then this is your dream in real life, but even better than you imagined. (Please scroll all the way down this page to see the drone video of the property.) There are two attractive homes on the property, but it's not only about the homes--it's about one of the most beautiful and explorable pieces of land anywhere along Costa Rica's Southern Pacific Coast, with a view of the ocean in the foreground and a backdrop of heavily forested mountains. There are already private walking paths back to a small stream with a multi-staged waterfall as your own picnic and meditation space. Create more paths as you wish and watch for birds of all kinds, monkeys, sloths, wild pigs, agoutis, ocelots and more.
