Property Description

Located in Ojochal, 5 minutes from the coastal highway, within the "Tortuga Abajo" area, this property is just off the coveted Calle Perez road - a very nice address. The property is comprised of 2 fully titled lots, totalling just over an acre, on which the main house and guest house are located. The location of this property is truly spectacular, providing awe inspiring views, to the east gorgeous mountains, looking southward down the coast and directly upon the Terraba river basin, Garza Island, ocean shoreline, crashing whitewater and in the near distance, the massive green mountains that flank the coast with the Osa Peninsula in the background. Just to the left of the house there is a thoroughfare through the jungle where troupes of white-face capuchin monkeys pass by and dozens of mating Scarlet Macaws nest each Fall. From the 2 observation towers at either end of the house, more distant views are possible.
