Property Description

Imagine driving over a large private bridge spanning the Coronado River and passing through an intricately decorated gate (a work of art some may say), to enter a small, tranquil, and nature-immersed community surrounded by a majestic jungle bordered by a crystal clear mountain river. This property is one of three, located on the largest lot and the tip of the pizza-slice-shaped lot, where the perfectly manicured grounds, reminiscent of a park and landscaped with native plants and shrubs, seamlessly blend into the surrounding forest. On sale for the first time, the beautiful surroundings of this property are complimented by multiple shared amenities available for the residents of this small community. While the community is integrated into the nature that extends far in all directions of Tres Rios, the village of Ojochal, with its services, entertainment, and shopping, is only 4.5 km away.
